

'Honeycomb' Card

by Jo McKelvey

Materials:

Pearlescent cardstock
Linen Cardstock Black card
Yellow Core'dinations Cardstock
Black Fine liner
Collall Tacky glue Collall All purpose Glue
Collall 3D glue gel Acetate Glitter
Diamond Press dies and embossing Folder
Ribbon Sparkle Pen - Moonlight

Method:

1. Cut a 7" x 5" card blank from pearlescent cardstock.
2. Matt black card onto the blank then matt that with some white linen cardstock.
3. Cut hexagons in different sizes from black card and Core'dinations, then emboss some of the yellow ones.
4. Make a Bee - Cut two larger oval in black card and one in acetate, and one smaller one from Core'dinations, plus two tiny little strips of black card.
5. Cover the back with Tacky glue and place the little strips over. Add more Tacky glue and cut the acetate oval in half. Add this to the oval, then, using some 3D glue gel, add the other black oval. Glue some lines over the Core'dinations card and shake some glitter over. Stick this to your bee.
6. Assemble the hexagons along the left of your card. Once happy, stick into place, raising random ones of your choice with 3D glue gel. Then add your bee.
7. Using a Fine liner, dash little lines around the whole card.
8. Cut 2 tags - 1 in white and 1 in black - using the stamps. Stamp 'Thanks' and mount the two together. Add a hexagon and a ribbon bow, then fine line the edge of this - stick it to your card with 3D glue.
9. Using Moonlight Sparkle pen add some sparkle to the Core'dinations card.
